

Biography

Dr Sam Guirguis B.D.S. F.R.A.C.D.S.
Cosmetic and Neuromuscular Dentist

Dr Sam Guirguis has a passion for his work like no other. His desire to aid others with their dental health has led him to achieving his F.R.A.C.D.S. and seen him train at the Las Vegas Institute for Advanced Dental Studies (LVI) for the past five years.

Prior to owning his practice he gained experience in general dental practice and a Part-time Clinical Instructor at Sydney University, teaching the undergraduate dental students. He also trained and worked in the U.K., New Zealand and country N.S.W. It was during this time that his philosophy became clear. He now focuses his efforts on cosmetic reconstructive dentistry with an emphasis on neuromuscular occlusal philosophies.

His drive to share his knowledge has led him to tutor and teach peers and colleagues. Recognizing the need to simplify clinical techniques and systems, allowing those he teaches to optimise their potential and gain insight and understanding into predictable cosmetic restorative procedures.

Dr Guirguis has experience in many aspects of dentistry including post graduate studies in orthodontics, implants and cosmetic full mouth rehabilitation. This has allowed him to achieve recognition as one of only four LVI clinical instructors in Australia.

His enrolment as a F.R.A.C.D.S. (Fellow of the Royal Australasian College of Dental Surgeons) has given him a wonderful scientific background that allows his presentations to be highly informative, evidence based as well as highly entertaining.

He is a graduate of the prestigious Las Vegas Institute (LVI) completing courses in cosmetic full mouth reconstruction and neuromuscular occlusal and orthodontic philosophies.

He is a member of various associations including the International College of Craniomandibular Orthopedics (ICCMO), the American Academy of Cosmetic Dentistry (AACD), and the Royal College of Dental Surgeons (R.A.C.D.S.) and maintains a private practice in Castle Hill, NSW with his business partner Dr Fred Calavassy.

Dr Guirguis' commitment to his dentistry shines through, from the patients he treats to the dentists he teaches. Along with his clinical and practical approach to teaching he brings awareness and "real life" examples that may be used by both experienced dentists and new graduates alike. These skills allow him to be a captivating educator who excels at delivering dynamic presentations while maintaining a clinically related focus.
